

DISTRIBUTION AND LOGISTICS MANAGEMENT OF COMPOSITE PLASTICS AND LIGHTING PRODUCTS

OVERVIEW AND CORE COMPETENCIES *PROGRESS IN PLASTICS, PRIDE IN COMMUNITY*

Since its inception in 2015, Cherokee Composites LLC has mastered the regulations, processes, procedures, and best practices for industry service in product distribution, installation, transport logistics, project management services, and client satisfaction. We want to serve critical transportation, defense, healthcare, education, and safety projects. With our established infrastructure including human resource management, facility maintenance, worker safety standards, environmental preservation techniques, quality performance assurance program, technologies, and reporting systems, we deliver on time, at cost and with ultimate efficiencies.

The composite-based plastic and lighting products and mechanisms we distribute and install with our manufacturing partners assist in the protection and support of national, state, tribal and local in highway safety, navigational waterway passages, airport directional accuracy, hospital operations, and defense training systems. We weave accountability, dependability, consistent communications, cost-efficiencies, and project management skills into all our endeavors. Using time-tested logistics and regulatory compliant activities, we send the manufactured composites and/or equipment of strength, durability, and longevity to any location around the globe. We also work diligently with our partners and vendors to maximize workforce training and retention opportunities in our communities to expand the geographical economic foundation.

The company, based in Claremore, OK, near Tulsa, was founded by Lisa Surritte, long a practitioner and manager in health care systems and medical product distribution, who grew her interest in logistics, distribution, and human resources to enter the safety product manufacturing and distribution industry. She leads Cherokee Composites with her expert ability in finding the best technical people, for the best project solutions, at the best prices, with the best results.

► CORPORATE SERVICES & PRODUCTS

CORPORATE SERVICES & PRODUCTS As your SBA certified **HUBZone** and **SDB** contractor, Cherokee Composites offers unique capabilities to deliver products, tools, and services on time and at cost to exceed your expected project impacts. We are a **WOSB** and Indian Owned Small Business Economic Enterprise (**ISBEE**) and give you the tailored one-stop-shop option for coordination of all distribution and installation requirements with trusted partners, vendors, skilled managers, facility leases, machinery, vehicles, and an experienced workforce. We reduce your calendar contract time and start up; increase centralized management; and solidify communications and reporting for ongoing work together.

"Our ongoing engagement and learning with the industry "state of the science" and our involvement with the "state of the art" of community building and youth empowerment activities give us purpose and pride daily."

Lisa Surritte , CEO

SERVICES & PRODUCTS	BENEFITS TO YOU
 PRODUCT DISTRIBUTION & SUPPLY CHAIN SUPPORT Delivering project plans and staff for plastics and lighting projects and vendor coordination including receipt, inventory packaging, mapping, transport, installation, supervision, delivery, and reporting of various newly manufactured products.	We provide deep industry and cross industry experience focused on bringing plastic products, lighting equipment, molds and tools to the transportation, healthcare, aviation, defense, aeronautic and oceanic programs.
 PLASTICS & LIGHTING MANUFACTURING & INSTALLATION Providing purchase, installation, supervision, management, and maintenance for exact facility specifications. Staffing and oversight for precision plastic machining, molding processing, fabricating, heat bending, cold forming, heat stamping, edge finishing and polishing, flame polishing, bonding, welding, and lighting systems.	We offer our established industry partnerships and professional networks to identify, recruit, train, reimburse and supervise the technical, logistical and installation expert talent for your projects.
 PROJECT MANAGEMENT Offering on- and off- site requirements analysis, deliverable planning, process specification identification, GANNT phasing, invoicing points, timeline development & compliance, deliverable charting, budgeting, staffing, team management, client communications and reporting. We strictly manage the six central components of project completion: <i>schedule, cost, safety, quality, function, and scope.</i>	We serve to design your project rapidly and accurately with easy to interpret tracking tools and consistent oversight of tasks, costs, resource allocation, deadlines, deliverables, and reporting processes. By utilizing ongoing recruitment, training, supervision, and management processes, we rapidly deploy on- and off-site professional staff in short- or long- term settings and keep your infrastructure strong, error-free, and visible.
 COMMUNICATIONS & CREATIVE PROGRAM SERVICES Strengthening your manufacturing programs with a variety of organizational services and staffing including data collection and analysis, formative research, needs assessment, facilitation for forums & town halls, media management, crises communications, scriptwriting, editing, graphic arts, financial, accounting, technology, artwork, publications, websites, social media, facility maintenance requirements, and/or office support.	We assist you gather community, government, and business engagement by preparing stakeholders and key advisors with information, plans and structured discussions for projects and programs. Utilizing ongoing recruitment, training, supervision, and management processes we deliver rapid deployment of on- and off-site professional staff in short- or long-term settings and keep your infrastructure strong, error-free, and visible.
